

THE LIGHTING
COLLECTION

THE SOHO LIGHTING CO.

Luxury is an often indefinable quality, the ethereal essence that transcends definition, revealing itself in the touch, the sight and the experience. It's an unmistakable mark of distinction, a realm above the ordinary.

At Soho Lighting, our philosophy is to design and manufacture luxury lighting products and accessories that are expertly and *sustainably crafted* to offer *exceptional quality*.

Our collections are an harmonious blend of beautiful design and state-of-the-art technology, available in an array of stunning finishes for *exceptional interiors*.

THE SOHO LIGHTING CO.

**CO-FOUNDER,
LEE LOVETT**

A passion for lighting led to
the creation of the company.

ABOUT US

Our story begins in Soho, London in 2017. We struggled to find the right lighting for our own renovation projects, refurbishing historical buildings in one of the capital's most characterful neighbourhoods.

Passionate about interior design and with a firm belief in the transformative power of lighting, we saw an opportunity to create beautiful lighting, switches and sockets that are inspired by period properties yet adapted and technically enhanced for modern living.

Lighting that elevates and enlightens, is reliable, high performing and responsibly made; lighting that offers more than just good looks, marrying form with function for visual comfort and pitch perfect ambiance. So we set up The Soho Lighting Company, creating superior lighting solutions enabled by innovative technology to help you bring your home to life.

“Lighting can make or break even the most carefully designed interior. It is both an art and a science, with the ability to elevate a space and reveal its true potential.”

Lee Lovett, Co-Founder & Creative Director

A Considered Approach

Sustainability is central to our design process and business practices. From the choice of materials and manufacturing methods, to our consideration of a product's lifecycle and circularity, we are committed to making a positive impact.

We are on our journey towards B Corp accreditation, with a mission to harness the transformative power of lighting to drive meaningful change for both people and planet.

INDUSTRY EXPERTS

Our *integrated approach* to each project

When you choose The Soho Lighting Company, you are gaining the expertise of our team of professional electricians who, alongside our customer service team, aim to deliver your project with care, efficiency, and expertise. We offer wiring design, extractions from plan and lighting design scoping calls; with each project overseen by a dedicated account manager. From an initial call, through to project scoping, sample room creation, to site visits, and on-time delivery, we are on hand for the duration of your project.

We also offer the opportunity to engage with our team of lighting planners and consultants for independent expert advice and plan production. Enlisting the expertise of a specialist lighting consultant enables you to make the most of your project, however big or small; they will select lighting that will optimise design details, create ambience, and enhance how you live within each space.

For more information about this service, please contact our customer service team on 0208 106 1221 or by email at info@soholighting.com

PENDANTS

Glass Library

Our Glass Library is an extensive collection of handblown glass pendants to suit every taste. Aptly named, our Library contains a wealth of choice, from classic to contemporary silhouettes, decorative and vintage styles to suit any stylish interior. Each shade is meticulously crafted and pairs beautifully with our range of bulbs and selection of fittings and finishes.

OUR Design *philosophy*

It's in the detail...

Passionate about craftsmanship, we care about the finer details. Our skilled design team creates lighting that effortlessly fuses form and function. In partnership with Enkin technology, our in-house team of electrical experts work hand in hand with our creators and makers to engineer beautiful, technically advanced lighting that will illuminate and transform your spaces.

With sustainable principles, we have purposely curated a collection of luxury lighting, bulbs, switches and sockets that offers exceptional quality with circular design, people and planet in mind. We balance traditional craft and skill with modern manufacturing to provide you with timeless and elegant lighting you will love for years to come.

Friends of the ocean

Fishy Filaments™ was founded in Cornwall and recycles used fishing nets and waste netting, transforming it into engineering grade filament to be used to make commercially viable products via 3D printing. Now that there is value in old netting, fishermen are no longer discarding nets into the sea and are actively retrieving old nets from our oceans. Lee Lovett says: "This fabulous sustainable concept from Fishy Filaments™, and other recycled plastic materials has enabled us to create beautiful, stylish pendants to adorn and light luxury interiors whilst helping to protect our diminishing ocean sea life."

THE SOHO LIGHTING CO.

"We feel passionately about connecting young people with commercial design, sustainable thinking, local manufacturing and circular economies. Our young are the ones who will drive and embed any positive environmental choices and changes we make today."

Lee Lovett Co-Founder

Award-winning community initiative

The Soho Cleaner Oceans Project is a pilot, involving ten schools near our creative hub in Cornwall, and aims to engage youngsters in sustainable thinking and design. Starting in March this year, the schoolchildren have learnt about the environment and recycling, undertaken beach cleans and then created their own light design, to be made from recycled plastics recovered from local beaches.

The results were an array of beautiful, innovative and inspiring designs that were judged by a stellar panel of industry experts including Interior designer Gerry Apponyi and the Decorex Sustainability Task Force. It was an incredibly tough decision which

caused much debate amongst the panel. Of "Bluebell", the winning design, they commented: "We fell in love with the bluebell concept. We adored how the delicate petals of this flower have been recreated and can see this pendant sitting beautifully in many interior settings!"

The overall winning design will be launched at Europe's premier Interior Design event, Decorex 2024 at Olympia. It will then join Soho Lighting's Ocean Collection and be made commercially available with proceeds awarded to the environmental charity, Surfers Against Sewage.

BULBS FOR

Every setting

At Soho Lighting, we offer a variety of traditional and vintage-style, high CRI light bulbs for perfect ambience.

THE SOHO LIGHTING CO.

China White

Dimmable, warm white LED light bulbs. These matt bulbs diffuse light more evenly, which reduces glare and harsh shadows. This softer light creates an inviting atmosphere in areas like bedrooms and living spaces and makes them a good choice for reading lamps. They blend well with light fixtures for a minimalist aesthetic.

High CRI

High CRI (Colour Rendering Index) gives you accurate colour representation, enhanced visual clarity and improved aesthetics. Available in a range of sizes and shapes, the notable high CRI offers near-natural light.

Sunset

This vintage-Edison style range provides the traditional look of the Edison decorative filament bulbs with the benefits of long-life, low-energy LED technology.

Dim To Warm

These intelligent bulbs mimic the dimming behavior of traditional incandescent bulbs by changing their color temperature as they dim. Offering versatility, they can produce bright, cooler light for tasks and activities during the day, and warm, soft light for relaxing in the evening.

China White

Sunset

High CRI

Drim To Warm

Downlights and Stair Lights

For functionality and aesthetic appeal, our Dimmable LED Downlights are available as fixed and tiltable fittings in a choice of fifteen beautiful finishes. With IP44 and IP65 ratings, they are suitable for use in kitchens and bathrooms. Choose the colour temperature from Warm White to Cool White and Dim to Warm to effortlessly set the tone of your space.

OUTDOOR LIGHTING

The Chelsea Collection

SOLID BRASS

MARINE GRADE STEEL

Perfect for illuminating your outside spaces, our Chelsea Collection is handcrafted from solid brass, water immersible with an IP68 rating, plus, due to its low voltage, kind to nocturnal wildlife.
